Quality you can see...

Grisport Footwear utilises the strength of many years' experience with cutting edge technology to make footwear with exceptional build quality. Beautifully tanned leathers, strong hardware, precise stitching and smart designs produce footwear that lasts the distance. Good design need not cost more.

Comfort you can feel...

We consistently strive to fulfil Grisport's paramount, ongoing mission - Comfort First and Forever - by creating a range of quality footwear featuring stylish designs and state-of-the-art technology.

Where it all began...

Grisport Italy

In 1977 Italian brothers Graziano and Mario Grigolato decided to put their know-how to work and created Grisport. Grisport was created to produce shoes and boots of supreme comfort and durability. Over the years Grisport has focused on state-of-the-art technology, innovation and R&D to become the leading manufacturer it is today.

Tradition and technology

Grisport's craftsmen still make footwear by blending a passion for footwear with state-of-the-art technology, resulting in a world class range of safety footwear.

Quality standards

Grisport has implemented a full ISO quality system ensuring that every pair is consistently made to the highest quality.

Where we are now...

Grisport New Zealand

Fast forward 30 years and in 2007 two Kiwi brothers, Ed and Martin Leenders, brought Grisport to New Zealand. Since then we have worked with a network of switched-on distributors throughout New Zealand.

We have travelled all over the world looking for footwear that suits Kiwis. Our experience and passion for footwear means that only the most trusted and proven styles are selected. If they don't perform in the field, they don't make the range. Our footwear trials have taken us from the building site to the factory floor and from mountain tops to the bush, and many places in between.

It is important to us to provide footwear that is comfortable above all else. If your footwear isn't comfortable, it's a long day at work!

We have also carefully selected the styles you see here to be suitable for New Zealand conditions. With our high rainfall, mud and often steep terrain, we are careful to concentrate on what New Zealanders need. The **Grisport New Zealand** collection was born on the foothills of the Dolomite mountains in Italy. With its steep mountainous terrain and a climate that includes hot summers, significant rainfall and snow in the winter, it is the perfect place to source a range suited to New Zealand.

Our close relationship with the Italian manufacturers enables them to produce exactly what our market demands, while retaining renowned Italian flair and quality.

It is our absolute pleasure to bring you the **Grisport New Zealand** footwear collection. We have selected it with you in mind.

Ed Leenders

Martin Leenders

@grisportnz

We love to hear from you

We love it when we get to see the amazing places our safety footwear goes. Share your hard work with us and the world.

We want to see it all, if you are working at height with a spectacular view, ankle deep in clay and mud, clocking up the miles on the factory floor or working with the real big toys on the job. First of all, keep safe, then, snap-it, save-it and share-it.

Synonymous with style and quality, 'Made in Italy' sets you apart from the pack. Italian flair and style mean you will look good even when you are at work.

Eco-Sustainability

Grisport maintains the strictest standards of eco-sustainability when selecting raw materials.

Furthermore, a photovoltaic system on the factory roof, which covers approximately 15,000 m2, supplies 70% of the power required for production (which is about 850,000 kW/h per year).

Responsibility

Grisport has produced a Charter of Human Responsibilities, or Code of Ethics, to ensure that the company is committed to respecting the rights, work, and dignity of the people involved on all levels and in all areas of manufacturing our products.

Traceability

Grisport has implemented an effective traceability system that enables us to trace back every step in the production process so we always know which materials were used.

Your feet will love Grisport

From the moment your foot slips into a pair of Grisport the rich leather upper cradles your feet and gives you the confidence that your feet are getting the best care for your working day. Great torsional stability, ankle supports to reduce ankle rollover, breathable linings and cushioned innersoles with Poron make sure that you will be ready for anything.

Premium Comfort Innersoles

Every pair of Grisport Footwear comes with a premium comfort innersole for reduced fatigue and impact. It has an anti microbial layer and is powered by Poron for shock absorption. So now you know that all day comfort comes standard with each pair

- Wide fit last
- Anti-static
- Padded toe inside the safety cap for comfort

Sizes UK 4-13
UNI EN ISO 20345:2012, S3, HRO, HI, WR, SRC

Which Safety Toe Best Suits My Application?

Steel Toe Cap - Perforated

Industry leading toecap for increased breathability and weight reduction. Excellent cut protection, limited penetration protection. Withstands 200J impact and 15kN compression tests.

- Select a Perforated Steel Toe Cap when:**
- You want cool, breathable footwear.

Composite Toe Cap

Our composite toe cap is made of Polymeric material. Generally a thicker toecap than steel it still withstands 200J impact and 15kN compression tests.

Differences from Steel toe caps include:

- Wider form gives a larger toe box
- Significantly lighter
- Does not set off metal detectors
- Cost a little more to produce
- Very low conductor of cold

Select a Composite toe cap when impact or crush is your primary concern and:

- You work in a very cold environment where a steel toe would transmit the cold to your foot
- Width is important
- Around metal detectors – such as airports

Steel Toe Cap

The most common toe cap type in New Zealand and arguably the best all round protection. Withstands 200J impact and 15kN compression tests.

Select a Steel Cap for:

- Better cut protection eg. from a chainsaw or skillsaw
- Better penetration protection eg. from a nail gun

Which Sole Type Best Suits My Application?

Vibram® Hammer Sole

Market leading rubber Vibram® outsole offers top performance in anti-slip and heat resistance (300°C) and good wear characteristics.

Total Grip Sole

Total Grip is a specially formulated PU sole providing outstanding comfort, less weight, high flexibility combined with excellent wear characteristics.

Contractor Sole

Rugged nitrile rubber outsole which will withstand temperatures up to 300°C. Provides high levels of anti-slip and is self cleaning. SRC rating provides superior grip across many surfaces.

Vibram® Milan Sole

Vibram® safety sole with heat-resistant rubber for superior grip and durability.

Vibram® Multi-Grip Sole

This super tough sole from world class manufacturer Vibram® is a heat-resistant rubber that has outstanding grip in a variety of conditions. SRC rating provides superior grip across many surfaces.

Vibram® STS Sole

This super tough sole from Vibram® has outstanding grip. The unique anti-torsion design protects the foot by reducing lateral twist. Anti-static. SRC rating provides superior grip across many surfaces.

Lightweight Sole

Super lightweight dual density PU sole for optimum comfort. SRC rating means superior anti-slip characteristics. Very wide fit.

Vibram® Bionik Sole

Super lightweight PU outsole with amazing grip and durability. SRC rated for maximum grip.

Cross Sole

PU and Rubber combine to make this light cross trainer sport style sole. It is at home on the trail or in the warehouse. SRC rated for maximum grip.

Vibram® Ranger Sole

A Triple layered sole, this is the pinnacle of boot performance. A block heel, rubber HRO rating and SRC rated for maximum grip and endurance.

Grisport Footwear is made using outstanding craftsmanship and materials to achieve exceptional quality. All Grisport Footwear has a warranty period of 12 months from date of purchase against any defect in workmanship or materials. This warranty does not cover fair wear and tear, neglect or inappropriate use.

Verona

GR70299

This unique style combines outstanding Italian design with a waterproof membrane, to take harsh New Zealand conditions in it's stride. The full grain Dakar leather is water-resistant, durable and easy to maintain.

FEATURES:

- Superior grip-rated sole
- Heat-resistant nitrile sole to 300°C
- Oil and chemical resistant Contractor sole
- Padded toe inside the safety cap for comfort

Sizes UK 4-12
UNI EN ISO 20345:2012, S3, HRO, HI, WR, SRC

Hercules

GR717

This high leg safety boot with muscle tackles the limits with ease. Excellent ankle support and a superior outsole provide increased safety, performance and comfort in the toughest work environments.

FEATURES:

- Anti-penetration midsole for added safety
- Dakar waxy full grain leather upper
- Steel toe cap
- Superior grip-rated sole
- Heat-resistant nitrile sole to 300°C
- Oil and chemical resistant Contractor sole
- Support System cradles the foot increasing ankle stability
- Wide fit last
- Anti-static
- Padded toe inside the safety cap for comfort

Sizes UK 4-13
UNI EN ISO 20345:2012, S3, HRO, HI, SRC

Safety Standards

Grisport safety footwear meets or exceeds the International safety standard (CE) UNI EN ISO 20345:2012

The CE marking will appear on the tongue label of the footwear and will also provide additional specific standards of the footwear. A summary of these standards are below:

Standards Code	Description
SB	Basic safety + 200J protective toe cap
S1 - Same as SB plus:	Fully enclosed heel Antistatic properties Energy absorption in the heel Hydrocarbon-resistant outsole
S2 - Same as S1 plus:	Water-resistant individual upper materials greater than 60 minutes
S3 - Same as S2 plus:	Puncture-resistant sole to 1100N Cleated outsole
HRO	Heat-resistant outsole- tested at 300°C for up to 60 seconds in 15 second increments
HI	Heat insulating – tested at 150°C
P	Puncture-resistant sole to 1100N
WR	Whole footwear resistant to water penetration / absorption
SRA	Slip resistance on standard ceramic floor with water + lubricant + detergent
SRB	Slip resistance on steel floor with glycerine lubricant
SRC	Slip resistance that meets both standards SRA and SRB above
WRU	Resistance to water penetration / absorption has been tested on individual materials of the upper
CI	Cold Insulating tested at -17°C
